

Sushant Tiwari

(571) 376-1545 • Morrisville, NC • sushanttiwari234@gmail.com

EDUCATION

University of North Carolina Charlotte

Bachelor's degree: Computer Science, Information Technology, Expected in 08/2024

Coursework: Java I, Java II, Data Structure and Algorithm, Logics and Algorithm, Software Engineering, Web App Design and Development

PROJECTS

Hotel Booking Website - JS | Python | Flask | MySQL.

- Developed a fully functional hotel booking website with a comprehensive admin management system.
- Integrated Python Flask as the server-side framework to handle requests and serve dynamic content efficiently.
- Employed MySQL for robust database management, ensuring secure and reliable storage of user data and booking information.
- Focused on optimization to ensure the website's fast performance, quick load times, and seamless navigation on various devices and browsers.

FOMO – Social Networking Platform

- Developed a full-stack social networking platform with user authentication, profile management, friend requests, and real-time notifications.
- Implemented a responsive web design using HTML, CSS, and Bootstrap for optimal user experience across various devices.
- Built a secure backend using Flask, integrating database operations for user interactions like posting, commenting, and liking.
- Utilized AJAX and JavaScript for dynamic content updates without reloading pages.
- Integrated image uploading and processing functionality for user profiles and posts.

Mini Games – P5.js | Java

- Conceptualized and developed two classic games, Minesweeper and Snake, using Java.
- Focused on robust game logic and algorithms to ensure challenging and engaging gameplay.
- Designed an intuitive user interface, prioritizing user experience and ease of navigation.

PROFESSIONAL EXPERIENCE

TELUS INTERNATIONAL | Rater

July 2023 – Present

- Regularly review and evaluate the relevance of search results, web pages, images, and other digital content using an advanced online tool, ensuring the accuracy and quality of information presented to users.
- Operate on a flexible, self-directed schedule, selecting and completing tasks related to evaluating search engine results and ensuring their alignment with specific search queries.
- Utilize both desktop/laptop and smartphone platforms to perform evaluations, leveraging extensive experience with Gmail, Google+, and other social media platforms to enhance the quality and relevance of search engine results.

SKILLS

TECHNICAL SKILLS

- Java | C++ | C# | Python
- AngularJS | ReactJS | Bootstrap
- SQL | JS | HTML | CSS | Flask
- Spring Boot | MySQL | GitHub
- Heroku | AWS | PostgreSQL
- Ajax | jQuery | SQLAlchemy

CERTIFICATION

- Microsoft Office Excel 2019
- Microsoft Office Word 2019
- Microsoft Office PowerPoint 2019
- Adobe Photoshop | InDesign | Lightroom
- Responsive Web Design Developer
- JavaScript Algorithm and Data Structures

COMPETENCE

- Leadership
- Problem-Solving
- Teamwork | Agile | Scrum
- Collaboration
